

LDR LED-Line-Tanklevel panel hat 22

A (Total length of aluminum)

Notes on configuration:

- Please observe the required edge distance of 50 mm during configuration !
- Profile length of profile hat 22 is possible up to max. 3000 mm.
- The board B35 (partition 175 mm, 6 pcs. LEDs/ 175 mm) is used for this product as standard. Additional board variants: B30 in blue, A30 (30 LEDs per metre) in daylight white or neutral white / RGB LEDs on request.
- Product weight approx. 0.35 kg/m

Maincable

Technical data:

- B35 6 LEDs/partition ; (A30 / 30Stk. LEDs/m, partition 200mm, on request)
- IP protection class similar to 69 K
- Ambient temperature -40 deg. C up to +50 deg. C
- Product material: Aluminium profile anodised E6/EV1 + polyurethane full encapsulation (powder-coated profile on request)
- In conformity with REACH and RoHS
- Technical updates with reservation

Installation instructions

- The safety instructions in the operating and assembly instructions must be observed !
- When installed outdoors, this product may only be operated when the vehicle is stationary.
- Observe the respective operating voltage at the LDR LED Line product in every operating state !
- Keep the original connection cable of the LDR LED Line profiles short !
- The electrical installation must be carried out by qualified electricians / mechatronics technicians !
- Supply lines + back-up fuses must be dimensioned according to the electrical power consumption of the LED Line products to be connected !
- Adhesive mounting
