Accessories

High-quality products for the storage of equipment.

Accessories: If rescue equipment must be quickly accessible, you will be in good hands with our accessories!

Tilting drawers:

We manufacture tilting drawers according to your requirements within 2-3 weeks.

- Ready to install pre-assembled set with drawer and guide rails
- Lightweight construction with bottom made out of aluminium composite panels and aluminium hollow sections
- A tilting drawer can be loaded without any ergonomic issues
- Standard height 110 mm
- Anodised surface for long-lasting quality
- The drawers are manufactured to your dimension specifications (width and depth)
- Safety is ensured with the generously rounded corners and edges
- Sturdy aluminium guide rails from extruded aluminium profiles
- Locked in closed position and provided with buffers at the ends
- Easy installation and integrated take out functionality
- Optional power assistance by means of a spring shaft
- Drawer dividing system to secure/ subdivide items available as accessory

Tilting drawers from LDR come with sturdy aluminium guide rails and generously rounded corners and edges.

Stock range:

Over the years of working as a supplier for fire engine manufacturers an interesting range of parts has gradually taken shape, which are used for the storage of equipment. In fire engines space is limited and expensive equipment must be stored in an organised manner and must be ready for use at all times.

We manufacture several of these products according to our own specifications, others we buy at wholesale rates from reputable suppliers. We keep large quantities in stock, ensuring these products are available at short notice and can easily be ordered by our customers. Our customers can order complete sets of shutters, drawers, lighting and accessories at any time.

As products such as spring clips or lock bearings are extremely universal, we now have a broad customer base in wide variety of industries.

An sample from our stock range:

- Stainless steel spring clips of 10 to 70 mm
- Plastic clips for diameters up to 180 mm
- Galvanised locking bearings with brackets from 50 to 90 mm
- Various handles and locking mechanisms
- Support plates for standard Storz hose couplings
- Inexpensive full extension telescopic rails in various lengths

Standard parts found in nearly every equipment room.
